

EDGE™ FLAPS

ELITE TRUCK & TRAILER AERODYNAMIC SOLUTION

10.49% FUEL SAVINGS AS PART OF THE EDGE ELITE AERO SYSTEM™

CUTTING YOUR COSTS, FUELING YOUR PROFITS

TRANSTEX® develops and manufactures leading-edge trailer aerodynamic solutions that offer fleets the ability to significantly reduce fuel consumption. A patented product made from a high-impact nylon polymer, EDGE™ FLAPS not only reduce water spray for increased safety, their wing-shaped channels reduce drag for trucks and trailers. **EDGE™ FLAPS are a highly engineered solution built to withstand the toughest road and weather conditions while improving trailer aerodynamics.**

THE EDGE™ ELITE ADVANTAGE

- 1% fuel savings
- 68% less water spray for increased visibility and safety
- Reduces drag with its wing-shaped channels for increased aerodynamics
- Impact resistant for the toughest road conditions
- Made to withstand all weather conditions without damage (-200°F to 200°F)
- Can be customized for corporate branding
- Various sizes available
- 2 year warranty

EDGE™ FLAPS

ELITE TRUCK & TRAILER AERODYNAMIC SOLUTION

10.49% FUEL SAVINGS AS PART OF THE EDGE ELITE AERO SYSTEM™

TRUSTED AND TESTED

Unlike other mud flaps and splash guards, E-FLAPS have been tested to withstand temperatures between -200°F to 200°F and have shown to sustain the toughest of road conditions, which is why they are backed by a 2 year warranty. Not only are they built to last, their patented wing-shaped design reduces road spray by 68% for increased visibility and safety.
