

EDGE FLAPS™

ELITE TRUCK & TRAILER AERODYNAMIC SOLUTION

10.49% FUEL SAVINGS AS PART OF THE EDGE ELITE AERO™ SYSTEM

CUTTING YOUR COSTS, FUELING YOUR PROFITS

TRANSTEX develops and manufactures leading-edge trailer aerodynamic solutions that offer fleets the ability to significantly reduce fuel consumption. A patented product made from a high-impact nylon polymer, EDGE FLAPS™ devices not only reduce water spray for increased safety, their aerodynamic louvers reduce drag for trucks and trailers. **EDGE FLAPS™ devices are a highly engineered solution built to withstand the toughest road and weather conditions while improving trailer aerodynamics.**

THE EDGE ELITE AERO™ ADVANTAGE

- 1% fuel savings
- 68% less water spray for increased visibility and safety
- Reduces drag with its aerodynamic louvers
- Impact resistant for the toughest road conditions
- Made to withstand all weather conditions without damage (-200°F to 200°F)
- Can be customized for corporate branding
- Various sizes available
- 2 year warranty

EDGE FLAPS™

ELITE TRUCK & TRAILER AERODYNAMIC SOLUTION

10.49% FUEL SAVINGS AS PART OF THE EDGE ELITE AERO™ SYSTEM

TRUSTED AND TESTED

Unlike other mud flaps and splash guards, EDGE FLAPS™ have been tested to withstand temperatures between -200°F to 200°F and have shown to sustain the toughest of road conditions, which is why they are backed by a 2 year warranty. Not only are they built to last, their patented aerodynamic louvers reduces road spray by 68% for increased visibility and safety.

Part Number	E-FLAP1827	E-FLAP2424	E-FLAP2427	E-FLAP2430
Application	Wide Base Super Singles	Trucks	Standard Dry Vans and Reefers	Long Dry Vans and Reefers
Width	18 in.	24 in.	24 in.	24 in.
Height	27 in.	24 in.	27 in.	30 in.
Weight	2.4 lb*	2.9 lb*	3.3 lb*	3.6 lb*
Fuel Savings	1%**	1%**	1%**	1%**

*Includes one EDGE FLAP™ Device and Hardware

**Tested through MVTs, ARC, and PIT Group
