

EDGE ELITE AERO™ SYSTEM

STREAMLINED AERODYNAMICS

TRANSTEX is the leader in the development and manufacturing of leading-edge solutions that offer fleets the ability to significantly reduce fuel consumption through elite aerodynamics for full trailer coverage. TRANSTEX is helping fleets set new fuel efficiency standards with the innovative EDGE ELITE AERO™ SYSTEM. The system includes EDGE SKIRTS™, EDGE TOPKIT+™, and EDGE FLAPS™ devices. Combined, all devices deliver 10.49% in fuel savings.

THE EDGE ELITE AERO™ ADVANTAGE

- Designed with minimal parts and no driver interaction required for reduced operating costs
- Lightweight combination for maximum payload capacity
- Designed for quick and easy installation
- Virtually no maintenance required
- Fuel savings of 12.09 gal/1,000 miles driven, or \$2,877 per trailer for a 6 month ROI

DESIGNED FOR THE TOUGHEST CONDITIONS

- Resilient solutions with industry-leading warranty
- Highly durable and flexible materials are impact resistant for durability without permanent deformation
- Designed to withstand all weather conditions

TRUSTED & TESTED

- EDGE™ products are EPA SmartWay Verified, CARB Compliant, and CARB GHG Phase 2 Pre-Approved
- EDGE™ products are tested using the following independent 3rd party facilities
 - Auto Research Center (ARC)
 - National Research Council (NRC)
 - Mesilla Valley Transportation Solutions (MVTs)
 - PIT Group – FP Innovations

ELITE FUEL SAVINGS

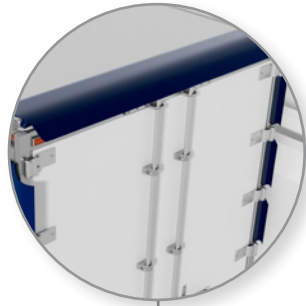

10.49%

12.09 gallons per 1,000 miles driven
\$2,877 per trailer for a 6 month ROI

*Tested with MVT Solutions

T-FLEX BLUE BRACKET

- A revolutionary patented product that bends but never breaks
- Concave design provides flexibility and durability without permanent deformation
- No wasted time adjusting, repairing, or replacing brackets
- Angled to withstand a stronger load before deflecting
- Keeps panels straight and reduces vibrations for optimized aerodynamics

EDGE TOPKIT+™

- Innovative solution that reduces drag and requires no driver interaction
- Simple design has minimal parts, requiring virtually no maintenance or downtime
- No moving parts for increased reliability
- Perfect for all trailer applications, including trailers with corrugated walls, roll-up doors, and lift-gates
- Intermodal compatible

TRANSTEX PATENTS

TRANSTEX stands by its products which is why we hold over 80 patents.

To view a list of all patents, visit www.transtex-llc.com/patents

EDGE SKIRTS™

- Lightweight solution
- Made of the strongest and most flexible materials
- Built for fast and easy installation
- Can withstand steep angled docks
- Can be customized for corporate branding

EDGE FLAPS™

- Reduces water spray for increased visibility and safety
- Reduces drag with its aerodynamic louvers
- Impact resistant for the toughest road conditions
- Made to withstand weather conditions between -200°F and 200°F without damage
- Various sizes available
- Can be customized for corporate branding
