

EDGE TOPKIT+™

ELITE TRAILER AERODYNAMIC SOLUTION

4.44% FUEL SAVINGS AS TESTED WITH MESILLA VALLEY TRANSPORTATION SOLUTIONS

CUTTING YOUR COSTS, FUELING YOUR PROFITS

TRANSTEX develops and manufactures leading-edge trailer aerodynamic solutions that offer fleets the ability to significantly reduce fuel consumption. The EDGE TOPKIT+™ is an innovative solution that reduces drag and requires **no driver interaction** for optimized trailer rear-end aerodynamics. One of the lightest rear aero solutions available, the EDGE TOPKIT+™ combines with EDGE FLAPS™ (24 in. x 30 in.) to provide fleets with **4.4%, or 511 gallons per 100,000 miles driven, in fuel savings as tested with Mesilla Valley Transportation Solutions.**

THE EDGE ELITE AERO™ ADVANTAGE

EDGE TOPKIT+™

- Innovative solution that reduces drag and requires no driver interaction
- Simple design has minimal parts, requiring virtually no maintenance or downtime
- No moving parts for increased reliability
- Perfect for all trailer applications, including trailers with corrugated walls, roll-up doors, and lift-gates
- Intermodal compatible

EDGE FLAPS™

- 68% less water spray for increased visibility and safety
- Reduces drag with its aerodynamic louvers
- Impact resistant for the toughest road conditions
- Made to withstand all weather conditions without damage (-200°F to 200°F)
- Can be customized for corporate branding
